

“THE THEORY OF EVERYTHING” OF BENJAMIN LESBIOS

Benjamin Lesbios or Benjamin of Lesbos was a scholar monk of Greek enlightenment, who lived in the age of A. Korais, Th. Kairis and E. Voulgaris. Clearly influenced by the spirit of Western European enlightenment, Benjamin was accused by Orthodox Church officials for teaching the new natural world knowledge. He was an important philosophical mind of Greek enlightenment and he introduced the *Pantachekineton*, a pioneering unifying natural theory.
