

COSMIC-POETIC AND SYMBOLIC VISIONS IN ICONOGRAPHY OF SERBIAN MEDIEVAL NUMISMATICS IN THE WORK OF SERGIJE DIMITRIJEVIĆ (II)

An effort is made to show the cosmic-astral-poetic and symbolic representations, primarily five-pointed and six-pointed stars, as well as the appearance of stars and the sun, with accompanying motifs (lily, cross, scepter, banner with cross, etc..) on the Serbian medieval money from the collection of Sergije Dimitrijević. The starting point for this approach was, in addition to the *Catalogue of Serbian medieval coins* of Sergije Dimitrijević, and the study of Milan S. Dimitrijević *Cosmic motifs in the Serbian medieval numismatics*.
