

## **WHO FIRST GRADUATED ASTRONOMY ON THE UNIVERSITY IN BELGRADE?**

On the basis of archival material of Astronomical observatory and other sources, here are presented data, which as we think, seriously bring in question the conclusion of Jelena Milogradov Turin that “the first student who graduated astronomy at University in Belgrade” is Slobodanka Dimitrijević. Does one could consider, on the basis of facts presented here, that befor her at the same University graduated (and) astronomy our first woman astronomer with scientific function Ružica Mitrinović?!
