

## **DEVELOPMENT OF ASTRONOMY IN KRAGUJEVAC**

Initial developments of astronomy in Kragujevac are connected with Faculty of Sciences, particularly with Department of Physics. In this contribution I present the history as an actor, as well as developments which I realized after discussions with colleagues. During the writing of this text I have tried to be as much objective as I can, and to express just facts, without personal views of the presented events.

**Key words:** History of Astronomy, Education of Astronomy, Amateur Astronomy, Kragujevac
