SURVEYS AND SPECTRAL LINE VARIABILITY IN EXTRAGALACTIC OBJECTS

Chair: **D. Ilić**

9:30 - 10:00	<i>Maria Charisi,</i> <i>USA</i>	Multi-messenger searches for supermassive black hole binaries
10:00 - 10:30	<i>Marco Berton,</i> <i>Chile</i>	Exploring the jet-BLR connection: flare-induced variability in the optical emission lines
10:30- 10:50	<i>Nataša Bon,</i> <i>Serbia</i>	Variability of AGN in the context of the main sequence of quasars
10:50 - 11:10	<i>Paola Marziani,</i> <i>Italy</i>	Metal content along the quasar main sequence
11:10 - 11:30	<i>Yu-Yang Songsheng,</i> <i>China</i>	Resolving close binaries of supermassive black holes in the era of optical interferometry
12:00 -	<i>Conference excursion</i>
