Astronomical Society "Rudjer Boskovic" is the oldest one in the Balkans. It was founded in 1934, and its main goal is popularization of astronomy.

The Society is located in two buildings, Public Observatory and Planetarium. Both of them, as well as the society itself, celebrated anniversaries in 2014 - the Society 80 years, Public Observatory 50 years and Planetarium 45 years since the establishment.

In this paper, a brief history of the Society and its activities are presented.
